

IRINA MOTUZ

Quality Assurance Analyst

929-202-3525 | irinamotuzwork@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

QA Engineer with 6+ years of experience testing web, mobile, and enterprise applications in Agile environments, including complex Salesforce-integrated systems. Strong background in end-to-end, integration, API testing, and data validation across business-critical workflows.

Currently focused on test automation and modern QA engineering using Playwright, JavaScript, and AI-assisted testing workflows. Interested in building scalable automation frameworks, improving test efficiency, and applying AI tools and agents to enhance software quality processes.

TECHNICAL SKILLS

Test Engineering:

Functional, Regression, End-to-End (E2E), Smoke, Exploratory, UAT, Integration, UI Validation

Salesforce (Integration Context):

End-to-End Workflow Validation, Business Process Testing across Salesforce-integrated systems, Data Flow & API Validation

API & Integration Testing:

REST APIs (Postman, REST Assured), Data Mapping & Validation, Response Verification

Data Validation:

SQL Queries, Database Verification, Data Integrity Checks

Tools & Platforms:

Salesforce, Jira, Confluence, Web / iOS / Android Applications

Development Practices:

Agile/Scrum, SDLC/STLC, Sprint Planning, Backlog Refinement

AI Tools:

Microsoft Copilot for test case generation, test design, and documentation

CORE COMPETENCIES

Test Planning & Execution | End-to-End & Integration Testing | API Validation |
Salesforce-Integrated Systems Testing | Defect Management & Root Cause Analysis |
Requirements Analysis | Test Coverage Optimization | Cross-Team Collaboration

PROFESSIONAL EXPERIENCE

Reliance Matrix – Quality Assurance Analyst II

Jan 2023 – Present

- Validate enterprise applications across complex multi-system integrations, ensuring accuracy of end-to-end business workflows
- Execute functional, regression, and end-to-end testing, identifying critical defects prior to production releases
- Validate business processes involving Salesforce and integrated systems, ensuring correct data flow across APIs and UI layers
- Perform API testing using Postman and REST Assured, verifying request/response integrity and system behavior
- Analyze requirements and user stories to design comprehensive regression coverage and reduce release risk
- Log, track, and prioritize defects in Jira, collaborating closely with developers through resolution
- Participate in Agile ceremonies, contributing to sprint planning, backlog refinement, and test strategy discussions
- Use Microsoft Copilot to accelerate test design, improve test documentation, and enhance exploratory testing efficiency

Cleveroad – Software QA Engineer

Apr 2020 – Dec 2022

- Conducted smoke, regression, and end-to-end testing for web and mobile applications across multiple domains
- Performed API testing and validated integrations using Postman and REST Assured
- Verified database accuracy using SQL queries, ensuring consistency between UI, APIs, and backend systems
- Identified, documented, and tracked defects in Jira, supporting timely resolution and improving product stability
- Collaborated with cross-functional teams to clarify requirements and ensure adequate test coverage

EDUCATION

Bachelor of Engineering (B.E.), Multi-Channel Telecommunication Systems — Volga State University of Telecommunications and Informatics, Russia

Associate Degree, Multi-Channel Telecommunication Systems — Kazan College of Information Technology and Communication, Russia

CERTIFICATIONS

- Learning Azure DevOps — LinkedIn Learning, 2023
- Python Programming (Intro + Data Structures) — Coursera, 2022
